Regression Models: Tutorial Sheet 3B

1. Describe how to use to the Akaike Information Criterion for model selection.

2. Compare and contrast three types of variable selection procedure.

3. Explain what variable selection procedures are used for.

4. Model Selection Question x_1, x_2, x_3 and x_4.

    Suppose we have 5 predictor variables. Use **Forward Selection** and **Backward Selection** to choose the optimal set of predictor variables, based on the AIC measure.
